// Founding Engineer · Tech Lead · Prototype-Driven · AI-First

20 years shipping software across IoT, fintech, logistics, and SaaS.
I unstick teams by turning vague problems into working prototypes fast, then hardening the best ideas into production systems. Strong across frontend, backend, embedded, and platform work; increasingly focused on AI-assisted developer workflows and internal tooling.

20+ years shipping **15+** years leading teams **10+** greenfield products **100+** enterprise customers **2.4M+** bank app users

EXPERIENCE

Stravito — Feb 2026 – present
Senior Full Stack Engineer · Consultant · Team of 5

- Delivered a full project for a top-tier FMCG client ahead of schedule—the team's AI-first development approach (which I helped establish) was a key factor in the speed.
- Shipping features in React + Kotlin (picked up Kotlin from scratch on this project). React · Kotlin
- Championing AI-augmented workflows and helping teammates adopt them across the wider engineering org.

Independent — Oct 2025 – Jan 2026
Exploring AI dev tooling, side projects, consulting opportunities

Instabee — Mar – Sep 2025
Senior Full Stack Engineer · Team of 5

- Worked on the next-gen parcel locker platform across a 6,000+ locker fleet operating in 7 markets. Ubuntu Core OS · chromium · ARM devices
- Team had debated a fleet management dashboard for years; shipped a working prototype in ~2 weeks that unblocked the project and evolved into the production tool. Next.js · maplibre · PostgreSQL · GCP/Helm/Terraform
- Took ownership of an abandoned geospatial ranking service weeks before a new-country launch; automated the manual ops process using OSM/OSRM routing data and shipped a visualization UI in ~2 weeks, unblocking the launch. Go · Python · Next.js
- Adopted AI-assisted workflows on the team and ran tech meetups and knowledge-sharing sessions open to the wider engineering org. internal agents · custom tooling

NextML — 2023 – Feb 2025
Senior Full Stack Engineer · 8-person company

- Brought in as the frontend and greenfield-product partner for a backend-heavy team; took DeepInspection, an ML platform for rail damage detection deployed at Trafikverket and Bane NOR, from rough prototype to a sellable product
- Owned the frontend end-to-end: web maps, WebGL visualization, and low-level rendering performance work for massive geospatial datasets. Leaflet · WebGL · shaders

Ombori Apps now Phygrid — 2020 – 2023
Head of R&D / Head of IoT Platform

- Architected an IoT edge platform from scratch that shipped at H&M NYC flagship and IKEA Middle East, 6 stores in 2.5 months. custom Linux OS · device management · CI/CD pipeline · monitoring
- Built hardware integrations and shipped computer vision for face detection across retail deployments. 3D cameras · RFID/NFC · Bluetooth · GPIO

Nordnet — 2018 – 2020
Mobile Developer · Consultant

- Built a React Native trading app and shared UI component library for a leading Nordic bank with 2.4M+ customers and SEK 1.2T AUM. 2-year consulting engagement in parallel with Ombori.

Ombori Apps now Phygrid — 2017 – 2020
Mobile Developer

- Shipped React Native / mobile apps for retail clients; promoted to Head of R&D in 2020 to lead the IoT platform effort

Areal — 2005 – 2017
Head of Software Development · Yaroslavl, Russia · Team of 10

- Took an all-in-one internet access gateway from zero to several hundred enterprise customers across ex-USSR, with a single admin UI simple enough for non-specialist IT. firewall · proxy · mail · VoIP · VPN
- Founding-engineer role in a 20-person company: owned architecture, led a team of 10, handled PM and CTO-equivalent strategy while still shipping code daily
- Full stack across FreeBSD/Linux, networking, Node.js, IP telephony, and web; the 12-year foundation for everything since. SIP/Asterisk

SKILLS

AI & DEV TOOLING
AI-augmented workflows, LLM integration, prompt engineering, agent development, Vercel AI SDK, Google ADK, LangChain, RAG

FRONTEND
React, TypeScript, Next.js, Vue, React Native, WebGL, Three.js, Mapbox

BACKEND
Node.js, Python, Go, Kotlin, PostgreSQL, MongoDB, Redis

IOT & EMBEDDED
Ubuntu Core, Yocto, Azure IoT Edge, ARM, Linux kernel, MQTT

INFRASTRUCTURE
Docker, K8s, Terraform, AWS, Azure, GCP, GitHub Actions

OTHER
OpenCV, C/C++, ROS2, Geospatial, 3D modeling, FreeBSD

EDUCATION

Yaroslavl State University
MSc Computer Science, 2003–2008

LANGUAGES

English fluent
Swedish basic
Russian native

SIDE PROJECTS

UI Generator
AI-powered UI mockup and spec generator
Next.js · Gemini · Prisma

Garbage Truck Game
2D tablet game with AI-generated assets
Three.js · Phaser · OpenAI

Robot Arm
3D-printed arm, ROS2, web control UI
Python · ROS2 · Fusion 360

INTERESTS

DIY, 3D printing, robotics, gamedev, music production
